About

With 15 years in IT, I went from web developer to CTO. I specialize in managing cross-functional teams, development, analytics, DevOps, and architecture. I launched HL projects from scratch with 20k+ RPS. In my spare time, I teach at HSE, speak at IT conferences, write articles, and mentor. My passion for travel, motorcycles, and music complements my technical activities, helping me maintain a creative approach to solving complex problems.

Work Experience

Promsvyazbank, PJSC

May 2024 - Present

Director of Engineering, DevOps

Managing over 140 specialists of various levels, including department heads. Import substitution of GitLab and Nexus tools to improve CI/CD processes and artifact management. Implementing Kubernetes in the banking infrastructure to increase service scalability and reliability. Initiating and implementing Infrastructure as Code (IaC) approaches to automate deployment and resource management. Developing and implementing architectural solutions to ensure high performance, security, and scalability of systems. Implementing a DevOps culture and mentoring teams to improve development efficiency and quality.

Promsvyazbank, PJSC

November 2021 - May 2024

Director of Engineering, Educational Platform

Formed and coordinated the work of a cross-functional team of 60+ specialists, including the management of outstaff resources. Led the launch of a high-load international educational platform from concept to successful production. Developed and implemented architectural solutions that ensured high scalability and security of the system. Initiated and supervised the implementation of DevOps practices, setting performance metrics to optimize development processes. Standardized development processes and introduced tools to improve code quality and team productivity. Effectively interacted with stakeholders, presenting projects to top management.

Promsvyazbank, PJSC

2020 - 2021

Team Lead

Formed and led a cross-functional team of 7 specialists for a recruitment automation project. Conducted requirements analysis, developed system architecture, and actively participated in product planning. Led the development of a career portal and implemented E-staff. Designed and coordinated the development of integrations with key systems (SAP, E-Staff, corporate portal).

Guta Group

2019 - 2020

Team Lead

Managed the development and support of a high-load online store on PHP (Bitrix). Optimized system performance and improved user experience. Implemented CI/CD to simplify and control build and deployment processes. Developed integrations with the MindBox CRM system and medical services using the HL7 standard.

Lev Group

2015 - 2019

Co-founder and Technical Director

Developed the technological strategy and optimized the IT budget of the agency. Introduced Agile methodologies and project management tools. Standardized solutions (1C-Bitrix, Laravel, React, Angular), reducing development time and ensuring predictable project scalability.

Freelance

2010 - 2015

Web Developer

Developed websites on WordPress, Magento, and 1C-Bitrix. Full project lifecycle: from requirements analysis to support. Worked with a variety of projects and clients from different industries.

Education

Irkutsk National Research Technical University

2016 - 2021

Bachelor's Degree in Computer Science and Engineering

Skills

System Architecture Microservices API Design High-Load Systems Team Leadership
Agile Cross-functional Teams Project Management Kubernetes Docker Terraform
